Specification

1. The disclosure is objected to because of the following informalities: there is a missing serial number from pages 5,7,13.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 1 calls for a power supply module. However, the body of the claim recites a power supply module and a main module. The preamble should be changed to reflect that more than just a power supply module is being claimed. Further, the battery and the detector element are not structurally connected to other elements in the claim. Where is the battery and detector element located with respect to the power supply module and main module? Also, the switching element is only inferentially mentioned in the claim. This situation renders the claim vague as to whether or not applicant intends to include the element in the claim, especially since the switching element is positively mentioned in claims 21,22.

Art Unit: 3737

Allowable Subject Matter

3. Claims 1-26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Getzow whose telephone number is (703) 308-2997.
